

Test Summary Report

SauceDemo Manual QA Testing

Project Type	Personal QA Portfolio Project
Application	SauceDemo E-Commerce Web Application
URL	https://www.saucedemo.com/
Testing Approach	Manual testing
Testing Areas	Functional, UI, workflow, negative and validation testing
Execution Status	Completed

1. Objective

To manually evaluate the core functionality of the SauceDemo e-commerce application, identify functional or validation issues, and document test execution results and observed defects.

2. Scope of Testing

The testing covered login and authentication behavior, product listing and sorting, product details, cart operations, checkout workflow, checkout validation, order completion, navigation, logout, and selected negative/edge cases.

3. Test Environment

Browser	Google Chrome
Application Type	Web application
Testing Method	Manual execution
Test Data	Valid and invalid login/checkout inputs

4. Test Execution Summary

Metric	Result
Total test cases executed	43
Passed	40
Failed	3
Pass rate	93.02%
Observed issues	3

5. Defect Summary

ID	Area	Severity	Priority	Observed issue
BUG-001	Checkout	Medium	Medium	Pressing Enter in the checkout form navigates back to the Cart page.
BUG-002	Checkout	Low	Medium	First Name field accepts numeric-only input.
BUG-003	Checkout	Low	Medium	Last Name field accepts numeric-only input.

6. Key Observations

- Core login, product, cart, checkout, navigation, and order-completion workflows were successfully exercised.
- Three issues were observed during negative/validation testing.
- The numeric-only name findings are documented as validation weaknesses; whether they are confirmed defects depends on the application's stated requirements.
- The Enter-key behavior is documented as an observed navigation issue and should be reviewed against the intended checkout form behavior.

7. Deliverables

Test case execution sheet, defect report, screenshots/evidence for observed issues, and this test summary report. These artifacts are intended as a personal QA portfolio demonstrating manual test design, execution, defect documentation, and reporting.

8. Conclusion

Testing of the selected SauceDemo workflows was completed with 43 test cases executed. 40 test cases passed and 3 failed, resulting in a 93.02% observed pass rate. Three issues were documented for review. This report represents a manual testing exercise performed as a personal portfolio project, not testing performed for the application's owner or as paid client work.
